Congratulations for taking on the controversial issue of rate consolidation for our water. It makes no sense to continue with the rate structure the way it is, as it is unfair to some of the users. Equalization across the board would make us all equally affected by changes and enable all users to benefit from positive changes or pay the price when increases are needed. Rural users should not be punished for living far away from services and political mass. Please consider the fairness issue and count not just the number of "votes" in favor of this issue, but the number who will be adversely affected by the consolidation. As I understand it--many more will be adversely affected by leaving the situation the way it is.
